See: Landing Page & Web App

2 I want a site that changes for each user
See: Dynamic

8 **Website** types explained

6 **Easy** Q&As answered

AI **Tip** inside every card

8 TYPES OF

WEBSITES YOU SHOULD KNOW

MENU

1 Static Website

Pages that look the same for every visitor. You change them by editing the code. Fast and cheap.

Good for: Resumes, event pages, small info sites

AI TIP Ask AI to write the HTML page for you.

MENU

2 Dynamic Website

Pages that change by user or time. They pull data from a database, like a login or a news feed.

Good for: News sites, bookings, member areas

AI TIP Use AI to plan your database and fix bugs.

MENU

3 E-commerce Website

An online shop. People see products, add them to a cart and pay online.

Good for: Selling products or digital files

AI TIP Let AI write product details and ads.

MENU

4 Blog Website

A site full of articles. The newest post shows first. People can comment and subscribe.

Good for: Writers, teachers, creators

AI TIP Get topic ideas from AI, then add your voice.

MENU

5 Portfolio Website

Your online CV. It shows your best work, your skills and how to contact you.

Good for: Designers, photographers, freelancers

AI TIP Ask AI to polish your bio and projects.

MENU

6 Business Website

Tells people who you are, what you sell and how to reach you. It builds trust.

Good for: Shops, clinics, agencies, startups

AI TIP Write service pages and FAQs fast with AI.

MENU

7 E-learning Website

A site for online classes with videos, quizzes and certificates.

Good for: Coaches, schools, trainers

AI TIP Turn your notes into lessons and quizzes.

MENU

8 Landing Page & Web App

A landing page has one goal, like sign up. A web app is a tool that runs in the browser.

Good for: Offers, campaigns, online tools

AI TIP Test many headlines quickly with AI.

QUICK

QUESTIONS & ANSWERS

Q1 Which website should a beginner build first?

A. A blog or a portfolio. They are easy and cheap, and you learn the basics of domains, hosting and content.

Q2 What is the difference between static and dynamic?

A. A static site shows the same page to everyone. A dynamic site changes its content using a database, like when you log in.

Q3 Do I need to know coding?

A. No. Website builders and AI tools can do most of the work. A little HTML helps you fix and customise things.

Q4 How can AI help me build a website?

A. AI can write text, suggest designs, create code and images, and translate. Always check its work before you publish.

Q5 How much does a website cost?

A. A simple site needs only a domain name and hosting. Online shops and custom apps cost more.

Q6 Can one website be two types?

A. Yes! Many sites mix types, like a business site with a blog and a shop. Start small, then grow.
